Serbian Software Cluster (SSC) was established as an association of eleven Serbian IT companies, three faculties and one R&D institute. SSC has good relations with governmental agencies, such as Ministry of Economy, SIEPA, and SME Agency.

Our mission is to develop software using latest technologies, for desktop applications and web solutions. Our scope is to address all business needs, from conceptualization to implementation, testing, and maintenance. Our experts are ready to answer your needs with innovative solutions and high-quality customer support.
